<b>CHANGE</b>					
21	MT29C1G56MACFAJC-75 IT	1G+256 Memory (NAND 1.8V)	U301	1	choose one
22	K5D1257DCA-D090000	512M+256M Memory (Nand 2.8V)	U301	1	

Additional memory was added to this device. A component (Part No.: RDA5800C) was eliminated because another component (Part No.: TLG1120 as per attached specification) can be used for BOTH TV Tuner and FM Tuner functions without modification. Shenzhen Super Test Service Technology Co., Ltd. perform proper testing on the FM Receiver Portion of the device and prepare a verification report for its FM Receiver Portion on December 8, 2009

There were no changes to the RF Transmitter and RF Transmitter circuitry of the Wi-Fi Portion of the device so we do not have to perform testing on its Wi-Fi Portion.

There were no changes to the RF Transmitter and RF Transmitter circuitry of the Bluetooth Portion of the device so we do not have to perform testing on its Bluetooth Portion.

I would like to confirm that above changes would influence to the GSM Portion of the device only.

Therefore, we would submit the Test Report for its GSM Portion with SAR Report.

Please issue new TCB Grant with Grant Note states, "This Class II Permissive Change adds additional memory with alternate parts. The highest reported SAR values are: Part 22 - Body-worn: 0.332 W/kg; Head: 0.852 W/kg and Part 24 - Body-worn: 0.430 W/kg; Head: 0.576 W/kg".

Sincerely,

Harvest Bloom Limited
